Explanations:

K	=	Written exam with indication of the duration in hours (hour = 60 minutes), cf. § 11 RPO	LN	=	LN = Performance record, cf. § 7
K + ÜS	=	Written exam and exercise certificate as admission requirement, cf. §§ 8, 7 and § 11 RPO	MN	=	Module grade
M	=	Oral examination with indication of duration in minutes, cf. § 10 RPO	GN	=	Total grade of the module examinations including master thesis with colloquium
M + ÜS	=	Oral examination and exercise certificate as admission requirement, cf. § 7, 8 and § 10 RPO	*)	=	One of these two modules must be chosen.
EA	=	Experimental work with indication of the workload in hours, cf. § 9			

A) If the students have already taken the subject Power Electronics according to §3 in their bachelor studies, they must choose a module from the list of compulsory elective modules (F) instead. For its examination and alternatives, the specifications for the selected compulsory elective module (F) apply, as well as the specifications for the Power Electronics module with regard to the regular semester and the weighting.

B) If the students according to §3 do not have a Bachelor's degree in Electrical Engineering or a related degree program, they must take the module REMMM 2120 "Electrical Energy Conversion and Transmission" instead of this elective module. In this case, the module may not be chosen again as an elective.

**) Students can choose from the open list of elective modules (AO) of the chosen degree program or, upon application to the examination board, from the pool of subjects of other Master's programs of the faculty or the range of courses offered by the university. The list can be updated annually.
(§ 6 Study Regulations of the Master's Program Renewable Energy and E-Mobility at Stralsund University of Applied Sciences).

***) Students can choose from the open list of elective modules (F) and (AO) of the chosen study program or on application to the examination board from the pool of subjects of other Master's degree programs of the faculty or from the course offerings of the university. One of the modules REEMM3600 or REEMM3800 can also be chosen provided that it is not included in the rubric Interdisciplinary qualifications (1 from 2) has been chosen. The list may be updated annually. (§ 6 Study Regulations of the Master's Program Renewable Energy and E-Mobility at Stralsund University of Applied Sciences)
