<p>Inhalte des Moduls / Syllabus</p>	<p>It is not possible to regard merely law as a purely national matter. Most aspects of law are influenced by and interacting with International and European sources of law. The international exchange of goods, people, services, and capital – especially in the market of the EU –, the growing mobility of companies as well as the worldwide communication require a certain view in dealing with cross-border transactions.</p> <p>In this context, international organizations, such as UN, EU etc., as well as contractually agreed instruments for dispute settlement, are particularly important. The intergovernmental cooperation of international and supranational organizations affect economic developments with regard to the protection of fundamental rights and freedoms in view of restrictions of competition. Altogether, the knowledge of International and European Law gained in this lecture, encourages the critical understanding of the workings of national law.</p>
